SKILLS

Frontend: HTML5, CSS3, Sass/SCSS, JavaScript, TypeScript, React, Tailwind CSS, styled-components, Redux Toolkit, Context API, Zustand, TanStack Query, Responsive Web Design, Mobile-First, REST API, Axios, Fetch API, npm, Vite, Webpack, React Hook Form.

Backend: Node.js, Express.js, JWT, OAuth, SQL, MySQL, PostgreSQL, GraphQL, MongoDB, Postman.

Tools: Figma, Cursor, Claude, ChatGPT, Gemini, Git, GitHub, GitLab, Docker.

Other: ATS Resume Optimization, Resume Writing, LinkedIn Profile Optimization, Career Consulting, Personal Branding, Agile, Scrum.

EXPERIENCE

Frontend Developer

[Breakthrough Academy](#) | Sep 2023 - Jun 2024

- Developed the client onboarding and consultation request flows for a consulting platform, building responsive React interfaces with JavaScript, HTML5, CSS3, and SCSS from Figma designs.
- Built dynamic assessment and application forms using React Hook Form, integrating REST APIs with Fetch API and Axios to streamline lead collection and consultant workflows.
- Implemented authenticated client dashboard features, collaborating with backend developers on API integration, fixing UI issues, and delivering features using Git and Agile practices.
- Improved mobile responsiveness and accessibility across customer-facing pages, providing a consistent experience on desktop and mobile devices.

Frontend Developer

[ORLAN](#) | Jun 2024 - Aug 2025

- Developed reusable UI components for consulting project management dashboards using React, TypeScript, and Tailwind CSS, reducing development time across new features.
- Built client and consultant management features, integrating REST APIs with Axios, managing server state using TanStack Query, and coordinating application state with Redux Toolkit and Context API.
- Supported implementation of authentication, user permissions, and profile management by integrating JWT-protected Express.js APIs and validating backend endpoints with Postman.
- Collaborated with backend developers on PostgreSQL data models and API contracts to deliver new consulting platform functionality on schedule.

Frontend Developer

[Unite Venture Studio](#) | Aug 2025 - present

- Developed subscription management and customer account features for web showcase selling online services, building responsive React and TypeScript interfaces with Tailwind CSS and React Hook Form.
- Built checkout and payment experiences by integrating payment APIs, handling subscription lifecycle states, transaction feedback, and secure authentication flows.
- Developed customer dashboards for managing purchased services, improving performance through TanStack Query caching and scalable state management with Zustand and Redux Toolkit.
- Collaborated with backend engineers on REST API design, Docker-based development environments, and automation workflows to accelerate product releases.

EDUCATION

Bachelor in Information Technology

[UNITEN](#) | Sep 2019 - Jun 2024

CGPA: 2.99 / 4.00
